

Design Support

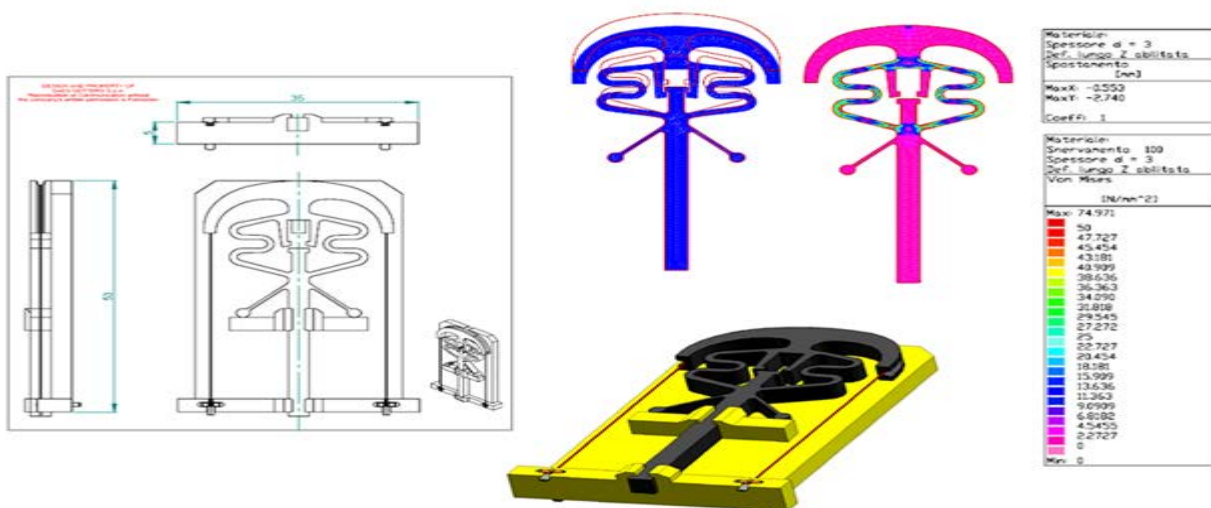

Let SAES help refine your concept. Our global team of experienced Product Development Engineers, creative Process Engineers and skilled Metallurgists are ready to assist you in realizing optimal device performance.

We are available to support you from the beginning, following your device development, from sketch to a final industrialized release, using our best engineers with a 20 years of experience in NiTi development.

We will help you in having a "smart" solution in the as short as possible time.

Design Capabilities:

- 3D CAD tools
- SMA modelling tools
- Electronic design and prototyping tools
- A dedicated prototype lab

making innovation happen, together
