

**PRESS RELEASE****Milan, November 13, 2014****SAES Group: The Board of Directors approved the results of the third quarter of 2014****Consolidated revenues equal to €32.3 million, up both compared to the third quarter of 2013 (+6.1%) and to the second quarter of 2014 (+6.3%)****Strong growth also for the total revenues of the Group¹ equal to €34.3 million (+8% compared to the third quarter of 2013, up by 6.8% compared to the second quarter of 2014)****Significant recovery in the revenues and in the results of the medical segment****Significant improvement in both the gross margin (from 37.7% to 44%) and the operating margin (from 1% to 12%) in the third quarter of the year compared to the corresponding period of 2013****Consolidated EBITDA doubled when compared to the third quarter of 2013 (from €3 million to €6 million)****Consolidated net income equal to €1.2 million, compared to a net loss of €1.6 million in the third quarter of 2013, showing a strong increase also compared to the second quarter of 2014 (+42.8%)****Considerable improvement of the net financial position compared to June 30, 2014 (from -€39.9 million to -€38 million) thanks to the operating cash flow**

The Board of Directors of SAES Getters S.p.A., gathered today in Lainate (MI), approved the consolidated results of the third quarter of 2014 (July 1 - September 30).

“The results of the quarter confirm what we expected and already announced” – said Mr. **Massimo della Porta**, Chairman of SAES Getters S.p.A. “The same positive trend will continue in the next months”.

In the third quarter of 2014, the SAES Group achieved **consolidated net revenues** equal to €32.3 million, up (+6.1%) compared to €30.5 million achieved in the corresponding period of 2013. The organic growth (+6.4%) was mainly concentrated in the business of shape memory alloys for medical applications, supported by a recovery in the demand both in the US and in Europe. Also the industrial SMA business improved, driven by the sales of both SMA springs for automotive applications and of educated wires for consumer electronic applications. Finally, the military sector, which had been heavily penalized in the third quarter of 2013 by the effects of the budget sequestration in the US, showed a recovery. Only the gas purification business decreased, due to lower investments in the display sector.

¹ Total revenues of the Group refer to consolidated revenues achieved by evaluating the 50% joint venture Actuator Solutions with the proportional method instead of the equity method.

The trend of growth is confirmed also by the comparison with the second quarter of 2014 (+6.3%), supported also by the positive exchange rate effect (+2.8%).

In particular, the growth of the shape memory alloys both for medical applications (+3.4% excluding the exchange rate effect) and for industrial applications (the organic growth was +23.1%) was confirmed. The Industrial Applications Business Unit returned to grow, driven by the trend reversal in the gas purification business (with a growth of +3.6% excluding the exchange rate effect) and by the growth in the vacuum pumps sector (with an organic growth of +81.5%). The positive trend in the Electronic and Photonic Devices Business continued (+13.6% excluding the currency effect), driven by the night vision and image intensifier applications.

Total revenues of the Group, achieved by incorporating the 50% joint venture Actuator Solutions with the proportional method instead of the equity method, were equal to €34.3 million in the third quarter of 2014. The increase, compared to the same period of 2013 where total revenues of the Group amounted to €31.7 million, was equal to 8%. Compared to the second quarter of 2014, where total revenues amounted to €321 million, revenues were up by 6.8%.

Consolidated gross profit² was equal to €14.2 million in the third quarter of 2014, up when compared to both the actual figure of the corresponding period in 2013 (€11.5 million), and to the same figure adjusted for the restructuring expenses (€12.5 million).

The gross margin recorded a significant growth, increasing from 37.7% (the same adjusted figure was equal to 41.1%) to 44% thanks to the improved product mix and to the effects of the organizational rationalization implemented in the second half of 2013.

Consolidated operating income amounted to €3.9 million (or 12% of revenues) in the third quarter of 2014 compared to €0.3 million (the same adjusted figure was equal to €2.3 million) in the corresponding quarter of 2013; the growth was mainly due to higher sales and to the improvement in the gross margin.

Consolidated EBITDA³ was equal to €6 million (18.6%), with a significant increase compared to €3 million (10%) in the corresponding quarter of 2013 (the adjusted figure was equal to €4.7 million or 15.4% in 2013).

Consolidated income before taxes was equal to €3 million, compared with an adjusted income before taxes equal to €1.9 million in the third quarter of 2013 (the actual loss including non-recurring expenses was equal to -€0.1 million).

Consolidated net income amounted to €1.2 million (3.7% of consolidated revenues) in the third quarter of 2014, compared to a net loss equal to €1.6 million in the third quarter of 2013.

Please note that the net income of the third quarter of 2013 included a **loss from discontinued operations** equal to €0.7 million related to the final exit of the Group from the CRT business (the result from discontinued operations in the current quarter was essentially equal to zero), as well as non-recurring expenses equal to €1.7 million.

For further details, please refer to the following sections of this press release.

Restatement of the income statement as at September 30, 2013

Please note that the figures as at September 30, 2013 have been restated, in accordance with IFRS 3, following the completion of the interim accounting of the combination of the “hydrogen purifiers” business acquired by Power & Energy, Inc. on April 19, 2013.

² Calculated as the difference between net revenues and industrial costs directly and indirectly attributable to the products sold.

³ EBITDA is not deemed as an accounting measure under International Financial Reporting Standards (IFRS); however, we believe that EBITDA is an important parameter for measuring the Group’s performance and therefore it is presented as an alternative indicator. Since its calculation is not regulated by applicable accounting standards, the method applied by the Group may not be homogeneous with the ones adopted by other Groups. EBITDA is calculated as “Earnings before interests, taxes, depreciation and amortization”.

Always in order to ensure a homogeneous comparison with the current period, please note that, as a result of the continuous technological evolution in the Organic Light Emitting Diodes business and of the delays in the commercial launch of OLED TVs, revenues and expenses of this segment as at September 30, 2013 have been reclassified within the Business Development Unit. Similarly, the figures related to the Energy Devices business, that doesn't have significant trade volumes, have been reclassified within the Business Development Unit. In this way, the Group can continue its research activities in both areas without any short-term commercial constraint, with the possibility to deepen its know-how in the field of hybrid getter and its potential applications.

Finally, the operating revenues and expenses related to the LCD business, that ceased to be significant, were reclassified within the Light Sources Business (Industrial Applications Business Unit).

Please note that, following the reclassifications that have affected the OLED business, the progressive resetting to zero of LCD revenues and the shutdown of the last factory dedicated to the CRT production, the Information Displays operating segment has ceased to exist.

Finally, please note the new segmentation of the Industrial Applications and of the Shape Memory Alloys Business Units and the new denomination of some business segments, to better respond to the current organizational structure of the Group.

SAES will host a conference call today at 15:30 CET.

The numbers in order to access it are the following:

From Italy: +39 02 802 09 11

From the UK: +44 1212 818004

From the USA: +1 718 705 8796

The presentation will be available at www.saesgetters.com at the following link:

www.saesgetters.com/investor/presentation

Those interested are asked to call a few minutes before the conference call begins.

The conference call will be available for replay for the next 24 hours:

From Italy: +39 02 72495

From the UK: +44 1212 818005

From the USA: +1 718 705 8797

Access code: 722#

Industrial Applications Business Unit

Revenues of the Industrial Applications Business Unit were equal to €20.5 million in the third quarter of 2014, down by 2.7% compared to €21.1 million in the corresponding quarter of 2013. The currency trend recorded a negative exchange rate effect equal to -0.3%, net of which revenues would have decreased by 2.4%.

The recovery of the Electronic and Photonic Devices Business, driven by the products for night vision and image intensifier applications, as well as of the Sensors and Detectors Business, supported by the products for infrared sensors, together with the increased sales of getter solutions for vacuum bottles and for vacuum panels for the refrigeration industry (Thermal Insulation Business), was not enough to offset the decrease in the gas purification business (Pure Gas Handling Business), mainly due to the decrease in the investments in the display sector.

The table below shows the revenues in the third quarter of 2014 related to the various business areas, with evidence of the exchange rate effect and of the organic change compared to the corresponding period of 2013:

Thousands of euro (except %)

Business	3 rd quarter 2014	3 rd quarter 2013	Total difference (%)	Price-Quantity effect (%)	Exchange rate effect (%)
Electronic & Photonic Devices	3,461	2,833	22.2%	22.5%	-0.3%
Sensors & Detectors	2,301	2,003	14.9%	15.0%	-0.1%
Light Sources	2,427	2,430	-0.1%	0.5%	-0.6%
Vacuum Systems	1,841	1,809	1.8%	2.8%	-1.0%
Thermal Insulation	1,513	1,417	6.8%	7.3%	-0.5%
Pure Gas Handling	8,988	10,617	-15.3%	-15.2%	-0.1%
Industrial Applications	20,531	21,109	-2.7%	-2.4%	-0.3%

Compared to the second quarter of 2014, whose revenues were equal to €19.6 million, the Industrial Applications Business Unit showed a turnaround, with consolidated revenues up by 4.9%, supported also by the strengthening of the dollar against the euro (the exchange rate effect was equal to +2.7%). In particular, please note the gradual growth of the *gas purification business* (+3.6% excluding the exchange rate effect), driven by the increase in the investments in the semiconductor sector and in that of LEDs for lighting. Also the *Vacuum Systems Business* (thanks to higher sales in the field of particle accelerators and in that of big research laboratories) and the *Electronic and Photonic Devices Business* showed a significant growth.

The table below shows the revenues in the third quarter of 2014 related to the various business areas, with evidence of the exchange rate effect and of the organic change compared to the second quarter of 2014:

Thousands of euro (except %)

Business	3 rd quarter 2014	2 nd quarter 2014	Total difference (%)	Price-Quantity effect (%)	Exchange rate effect (%)
Electronic & Photonic Devices	3,461	2,979	16.2%	13.6%	2.6%
Sensors & Detectors	2,301	2,488	-7.5%	-9.1%	1.6%
Light Sources	2,427	2,931	-17.2%	-18.7%	1.5%
Vacuum Systems	1,841	1,004	83.4%	81.5%	1.9%
Thermal Insulation	1,513	1,774	-14.7%	-17.3%	2.6%
Pure Gas Handling	8,988	8,390	7.1%	3.6%	3.5%
Industrial Applications	20,531	19,566	4.9%	2.2%	2.7%

The following table shows the **gross profit** and the **operating income** of the Industrial Applications Business Unit in the third quarter of 2014, compared with the corresponding figures, actual and adjusted, of the third quarter of 2013:

Thousands of euro

	3 rd quarter 2014	Industrial Applications		
		3 rd quarter 2013	of which: non recurring items	3 rd quarter 2013 adjusted
Total net sales	20,531	21,109	0	21,109
Cost of sales	(10,311)	(12,887)	(1,019)	(11,868)
Gross profit (loss)	10,220 49.8%	8,222 39.0%	(1,019)	9,241 43.8%
Operating expenses and other income (expenses)	(4,043)	(4,568)	(650)	(3,918)
Operating income (loss)	6,177 30.1%	3,654 17.3%	(1,669)	5,323 25.2%

Please note the increase in the gross margin, which increased from 43.8% (adjusted figure) to 49.8%: excluding the restructuring expenses that penalized the year 2013, the gross margin appears to be growing in almost all the segments of the Industrial Applications Business Unit, thanks both to the

shift in the sales mix towards products with higher margins, and as a result of the rationalization of the production structure implemented in the second half of last year.

The improvement in margins, together with the reduction of general and administrative expenses, led to a considerable increase in the operating income (+16.1% compared to the adjusted figure of the third quarter of 2013), despite the decrease in revenues. The quarter ended with an operating margin equal to 30.1%.

Shape Memory Alloys Business Unit (SMA)

Revenues of the Shape Memory Alloys Business Unit were equal to €11.4 million in the third quarter of 2014, compared to €9.2 million in the corresponding period of 2013. The increase (+24.3% excluding the exchange rate effect) was due to the growth of both the *medical segment*, supported by the recovery in the demand in the US and in Europe, and the *industrial* one, driven by the sales of SMA springs for automotive applications and of educated wires for consumer electronic applications.

The table below shows the revenues in the third quarter of 2014 related to the various business areas, with evidence of the exchange rate effect and of the organic change compared to the corresponding period of 2013:

Thousands of euro (except %)

Business	3 rd quarter 2014	3 rd quarter 2013	Total difference (%)	Price- Quantity effect (%)	Exchange rate effect (%)
SMA Medical Applications	10,241	8,448	21.2%	21.3%	-0.1%
SMA Industrial Applications	1,138	715	59.2%	59.3%	-0.1%
Shape Memory Alloys	11,379	9,163	24.2%	24.3%	-0.1%

Compared to the second quarter of 2014, consolidated revenues of the Shape Memory Alloys Business Unit recorded an increase of 8.3%, or of 5.1% excluding the positive currency effect. The *medical SMA business* increased by +3.4% (excluding the exchange rate effect) and confirms the positive trend recorded in the previous quarters of the current year; also the *industrial SMA business* confirmed its progressive growth (the organic growth was equal to +23.1% compared to the second quarter of 2014).

The table below shows the revenues in the third quarter of 2014 related to the various business areas, with evidence of the exchange rate effect and of the organic change compared to the second quarter of 2014:

Thousands of euro (except %)

Business	3 rd quarter 2014	2 nd quarter 2014	Total difference (%)	Price- Quantity effect (%)	Exchange rate effect (%)
SMA Medical Applications	10,241	9,597	6.7%	3.4%	3.3%
SMA Industrial Applications	1,138	910	25.1%	23.1%	2.0%
Shape Memory Alloys	11,379	10,507	8.3%	5.1%	3.2%

The following table shows the **gross profit** and the **operating income** of the Shape Memory Alloys Business Unit in the third quarter of 2014, compared with the corresponding figures, actual and adjusted, of the third quarter of 2013:

Thousands of euro	Shape Memory Alloys			
	3 rd quarter 2014	3 rd quarter 2013	of which: non recurring items	3 rd quarter 2013 adjusted
Total net sales	11,379	9,163	0	9,163
Cost of sales	(7,558)	(5,870)	(8)	(5,862)
Gross profit (loss)	3,821 33.6%	3,293 35.9%	(8)	3,301 36.0%
Operating expenses and other income (expenses)	(2,024)	(2,191)	(11)	(2,180)
Operating income (loss)	1,797 15.8%	1,102 12.0%	(19)	1,121 12.2%

The gross margin, which slightly decreased compared to that of the third quarter of 2013 because penalized by some start-up expenses related to the start of new productions in both the medical segment and in the industrial one, gradually improved during the year 2014 (26.8% in the first quarter of 2014 and 32.9% in the second quarter of 2014).

The increase in revenues and the continued control of operating expenses (substantially unchanged compared to the third quarter of 2013) led to an improvement in the operating margin from 12% to 15.8%.

Business Development Unit & Corporate Costs

The Business Development Unit & Corporate Costs includes projects of basic research or under development, aimed at diversifying into innovative businesses, in addition to corporate costs (costs that cannot be directly attributed or reasonably allocated to any business sector but that refer to the Group as a whole).

In the third quarter of 2014 **revenues** amounted to €0.4 million (€0.2 million in the corresponding period of 2013 and €0.3 million in the second quarter of 2014), made exclusively of OLED revenues.

Gross profit was positive and equal to €0.2 million in the third quarter of 2014, compared to a gross loss of €32 thousand in the same quarter of 2013 (the 2013 figure was substantially unchanged excluding restructuring expenses).

Operating income was negative and equal to €4.1 million, in line with the adjusted figure of the third quarter of 2013 (-€4.4 million the actual operating loss in 2013).

Consolidated gross profit amounted to €14.2 million in the third quarter of 2014, up when compared to €11.5 million in the third quarter of 2013. The increase was confirmed also by the comparison with the adjusted gross profit, equal to €12.5 million.

The gross margin was equal to 44%, compared to a gross margin of 37.7% (the adjusted gross margin was equal to 41.1%) in the third quarter of 2013.

Consolidated operating income amounted to €3.9 million (12% of consolidated revenues) in the third quarter of 2014, compared to an operating income equal to €0.3 million (1% of consolidated revenues) and an adjusted operating income of €2.3 million in the corresponding quarter of 2013 (7.6% of consolidated revenues).

Total **consolidated operating expenses** were equal to €10.6 million, down (-2.1%) compared to the adjusted figure of the corresponding period in 2013 (€10.8 million). In particular, general and administrative expenses decreased from €4.7 million to €4.5 million.

Thousands of euro	Total Business Units			
	3rd quarter 2014	3rd quarter 2013	of which: non recurring items	3rd quarter 2013 adjusted
Total net sales	32,307	30,453	0	30,453
Cost of sales	(18,079)	(18,970)	(1,025)	(17,945)
Gross profit (loss)	14,228 44.0%	11,483 37.7%	(1,025)	12,508 41.1%
Operating expenses and other income (expenses)	(10,343)	(11,174)	(985)	(10,189)
Operating income (loss)	3,885 12.0%	309 1.0%	(2,010)	2,319 7.6%

The **royalties** accrued in the third quarter of 2014 for the licensing of the thin film getter technology for MEMS of new generation amounted to €0.3 million, down compared to €0.5 million in the corresponding quarter of 2013.

The balance of **other net income (expenses)** was substantially equal to zero, compared with an income of €0.2 million in the third quarter of 2013 related to a penalty paid by a customer following the cancellation of some orders.

Consolidated EBITDA amounted to €6 million, compared to €3 million in the corresponding quarter of 2013 (the adjusted figure was equal to €4.7 million in the third quarter of 2013). As a percentage of revenues, EBITDA was equal to 18.6% in the current quarter, up compared to 10% in 2013, rising to 15.4% by excluding the restructuring expenses.

The net balance of **financial income and expenses** was negative and amounted to €0.5 million (compared to -€0.3 million in the corresponding period of 2013) and it mainly included interest expenses on loans, both short and long term ones, held by the Parent Company and by the U.S. subsidiaries and bank fees related to the credit lines held by SAES Getters S.p.A.

The loss deriving from the **evaluation with the equity method** of the joint venture Actuator Solutions amounted to €0.5 million, compared to €0.2 million in the corresponding period of the previous year.

The sum of the **exchange rate differences** recorded a slightly positive balance (equal to €50 thousand) in the third quarter of 2014, substantially unchanged compared to a positive balance of €60 thousand in the corresponding period of 2013, guaranteed by the same hedging policy adopted by the Group.

The third quarter of 2014 ended with a **consolidated income before taxes** equal to €3 million, showing a significant increase (+56.9%) compared to an adjusted income before taxes of €1.9 million in the third quarter of 2013. The non-adjusted loss before taxes was equal to €0.1 million in the third quarter of 2013.

Consolidated net income amounted to €1.2 million (3.7% of revenues) in the third quarter of 2014, compared to a net loss of €1.6 million in the previous year.

Please note that the 2013 result included a loss from discontinued operations equal to €0.7 million, related to the final exit of the Group from the CRT (cathode ray tubes) business. The impact from discontinued operations was almost equal to zero in the third quarter of 2014 (+€34 thousand).

The **consolidated net financial position** as at September 30, 2014 was negative and equal to €38 million (cash equal to €17 million and net financial liabilities equal to -€55 million), compared to a negative net financial position equal to €39.9 million (cash equal to €17.5 million and net financial liabilities equal to €57.4 million) as at June 30, 2014.

The improvement, due only to the cash-flow generated from the operating activities in the quarter (+€38 million), would have been even more significant excluding the penalizing effect of the revaluation of the dollar on the Group's indebtedness denominated in foreign currencies (-€0.6 million).

The outflows for investment activities, both in tangible and intangible assets, amounted to -€1.3 million in the quarter.

Please note that the net financial position as at September 30, 2014 does not include the collection deriving from the sale of the land use right and the building of the Chinese subsidiary SAES Getters (Nanjing) Co., Ltd., that was finalized at the end of October 2014. If including such amount, the net financial position would have improved by around €3.7 million.

January - September 2014

Consolidated revenues were equal to €95.9 million the first nine months of 2014, down by 3.7% compared to €99.6 million in the corresponding period of 2013. The currency trend led to a negative exchange rate effect equal to -2.4%, net of which the organic decrease in the revenues would have been equal to -1.3%.

Revenues of the *Industrial Applications Business Unit* amounted to €63.4 million, compared to €68.9 million in the first nine months of 2013 (with a negative exchange rate effect of -2.3% and an organic decrease of -5.6%): the strong growth in the sales of products for thermal insulation was not enough to offset the decrease in the gas purification business, whose decline is due to lower investments in new production facilities in the display sector and in that of semiconductors.

The *Shape Memory Alloys Business Unit* ended the first nine months of 2014 with consolidated revenues equal to €31.4 million, up by 5.6% compared to €29.8 million in the first nine months of 2013 (with a negative exchange rate effect of -2.7% and an organic growth equal to 8.3%). Please note the consolidation of the recovery in the medical segment (+5.8% excluding the currency effect) and the steady improvement of the industrial one (with an organic growth of +42.9%).

Total revenues of the Group, achieved by incorporating the 50% joint venture Actuator Solutions with the proportional method instead of the equity method, amounted to €101.1 million, compared to €103.1 million in first nine months of 2013. Please note the strong revenue growth of Actuator Solutions in the automotive sector (+48.1%).

Consolidated gross profit amounted to €41.4 million in the first nine months of 2014, compared to an adjusted figure (net of non-recurring restructuring expenses) of €40.3 million in the corresponding period of 2013 and a non-adjusted figure (including restructuring expenses) equal to €39.8 million. Despite the decrease in revenues, please note the improvement of the gross margin that increased from 40% (the corresponding adjusted figure was 40.4%) to 43.2%.

Consolidated operating income amounted to €9.1 million in the first nine months of 2014, up compared to an adjusted operating income equal to €7.1 million (the non-adjusted figure was equal to €5.1 million) in the corresponding period of 2013, thanks to an improved product mix and to the reduction of operating expenses, especially general and administrative expenses, despite the decrease in the revenues deriving from royalties (-€0.3 million).

Consolidated EBITDA amounted to €15.5 million in the first nine months of 2014 (16.1% of revenues) compared to €12.7 million in the corresponding period of 2013 (equal to 12.8% of revenues). Excluding restructuring expenses, the adjusted EBITDA was equal to €14.4 million or 14.4% of consolidated revenues in the first nine months of 2013.

Income before taxes was equal to €6.8 million in the first nine months of 2014, compared to an adjusted income before taxes (excluding restructuring expenses) equal to €5.8 million in the corresponding period of 2013 and an actual figure including restructuring expenses equal to €3.8 million: the increase in the operating income was partially offset by higher financial interests of the Parent Company and by a higher loss resulting from the evaluation of Actuator Solutions using the equity method.

Income taxes amounted to €4.6 million in the first nine months of 2014, compared to €2.5 million in the corresponding period of 2013. The tax rate for the first nine months of 2014 was equal to 67%: please note that, given the current organizational structure of the Group, it has been prudently decided to suspend the recognition of deferred tax assets on the tax losses realized in the period by the Italian companies of the

Group participating in the national tax consolidation program. The fiscal income prudentially not recognized amounted to €1.5 million and its inclusion would have reduced the Group's tax rate to 44.3%.

In the first nine months of 2013, the tax rate, equal to 65%, was mainly due to non-recurring restructuring expenses for which the Chinese subsidiary had ended the period with a tax loss on which any deferred tax asset had not been recognized.

Consolidated net income amounted to €2.5 million in the first nine months of 2014 (€0.1 million in the first nine months of 2013) and included an income from discontinued operations equal to €0.3 million related to the remaining proceeds deriving from the sale of the plant of SAES Getters (Nanjing) Co., Ltd. and to the final exit of the Group from the CRT business (compared to a negative figure of €1.2 million in the first nine months of 2013).

In the first nine months of 2014, the net income per ordinary share was equal to €0.1018, and the net income per savings share was equal to €0.1385; in the first nine months of the previous year, the net income per savings share was equal to €0.0130 and the net income per ordinary share was zero.

Actuator Solutions

Actuator Solutions GmbH is headquartered in Gunzenhausen (Germany) and it is 50% jointly owned by SAES and Alfmeier Präzision, a German Group operating in the fields of electronics and advanced plastic materials.

The joint venture is focused on the development, production and distribution of actuators based on the SMA technology and its mission is to become a world leader in the field of actuators using shape memory alloys.

Actuator Solutions GmbH, which in turn consolidates its wholly owned subsidiary Actuator Solutions Taiwan Co., Ltd. (established on June 14, 2013), recorded net revenues equal to €11.1 million in the first nine months of 2014; these revenues, totally generated by the sales of valves used in lumbar control systems of the seats of a wide range of cars, increased compared to €7.5 million in the first nine months of 2013 (+48.1%) because the lumbar control system based on the SMA technology is gaining more and more market share.

The net result of the period was negative and equal to €2.1 million, due to the research and development expenses in the various industrial sectors where the company will be present with its SMA actuators. In particular, Actuator Solutions GmbH, with the support of the laboratories in Lainate, is focused on the development of SMA actuators for the vending industry, the automotive sector, for the white goods sector and for the medical one, some of which have already generated the first orders; instead, the Taiwanese subsidiary is focused on the development of products for the consumer electronic market, such as those for the image focus and stabilization of mobile phones, which have found an increasing interest in the market and are currently subject to the qualification by some potential users.

Thousands of euro

The share of the SAES Group in the loss of the joint venture amounted to -€1 million in the first nine months of 2014, higher than that of the corresponding period of 2013 (-€0.5 million), despite the higher revenues in

the automotive sector (+48.1%), due to the costs related to the Taiwan-based subsidiary Actuator Solutions Taiwan Co., Ltd., established only at the end of the first half of 2013.

Events occurred after the end of the quarter

On October 13, 2014 the SAES Group, through its subsidiary SAES Nitinol S.r.l., signed an agreement with the joint venture Actuator Solutions GmbH for the granting of a loan up to a maximum value of €1.2 million, which is reduced of an amount of €33 thousand on a monthly basis starting from April 2015. The money supply can take place in one or more tranches, depending on the actual requirements of the joint venture. The contract provides for a flexible repayment of the principal amount within the due date (April 2018) and the recognition of a fixed annual interest of 6%.

On October 30, 2014 the sale of the land use right and of the building of the Chinese subsidiary SAES Getters (Nanjing) Co., Ltd. was completed; at the same time, the last tranche of the consideration provided for in the sale agreement signed in April 2014 has been collected.

Business outlook

In the next months we expect the current positive trend to continue.

In particular, the positive trend of the gas purification business will continue, as well as the one of the medical segment and of the industrial segment of the shape memory alloys business.

The net financial position will benefit from the positive impact of the operating activities' trend and from the closing of the transaction regarding the Chinese subsidiary SAES Getters (Nanjing) Co., Ltd. (approximately €3.7 million, at current exchange rates).

The figures are drawn from the Interim management report of the third quarter of 2014, not subject to audit. This document will be distributed through the NIS circuit of the Italian Stock Exchange and will be available to the public both on the Company's website (www.saesgetters.com/investor/report-account/quarter-reports) and on the centralized storage mechanism IInfo (www.Iinfo.it) starting from today.

The Officer responsible for the preparation of corporate financial reports of SAES Getters S.p.A. certifies that, in accordance with the second subsection of article 154-bis, part IV, title III, second paragraph, section V-bis, of Legislative Decree February 24, 1998, no. 58, the financial information included in the present document corresponds to book of account and book-keeping entries.

*The Officer responsible for the preparation of corporate financial reports
Michele Di Marco*

SAES Group

A pioneer in the development of getter technology, the SAES® Group is the world leader in a variety of scientific and industrial applications where stringent vacuum conditions or ultra-pure gases are required. In more than 70 years of activity, the Group's getter solutions have been supporting innovation in the information display and lamp industries, in sophisticated high vacuum systems and in vacuum thermal insulation, in technologies spanning from large vacuum power tubes to miniaturized silicon-based microelectronic and micromechanical devices. The Group also holds a leading position in ultra pure gas refinement for the semiconductor and other high-tech markets.

Starting in 2004, by leveraging the core competencies in special metallurgy and in the materials science, the SAES Group has expanded its business into the advanced material markets, in particular the market of shape memory alloys, a family of materials characterized by super elasticity and by the property of assuming predefined forms when subjected to heat treatment. These special alloys, which today are mainly applied in the biomedical sector, are also perfectly suited to the realization of actuator devices for the industrial sector (domotics, white goods industry, consumer electronics and automotive sector).

More recently, SAES has expanded its business by developing components whose getter functions, traditionally obtained from the exploitation of the special features of some metals, are instead generated by chemical processes. Thanks to these new developments, SAES is evolving, adding to its competencies in the field of special metallurgy also those of organic chemicals.

A total production capacity distributed in ten facilities, a worldwide-based sale & service network and nearly 900 employees allow the Group to combine multicultural skills and expertise to form a truly global enterprise.

SAES Group is headquartered in the Milan area (Italy).

SAES Getters S.p.A. is listed on the Italian Stock Exchange Market, STAR segment, since 1986.

More information on the SAES Group are available in the website www.saesgetters.com
