

**PRESS RELEASE**

**Milan, November 10, 2011**

**The Board of Directors approves the results of the third quarter 2011**

**Consolidated revenues of the quarter were equal to €37.8 million, with an increase of 7.6% compared to €35.2 million in the third quarter 2010**

**Consolidated EBITDA of the quarter was equal to €7.4 million (19.5%), showing an increase compared to €5.4 million (15.3%) in the third quarter 2010**

**Consolidated gross profit of the quarter equal to €15.6 million compared to €14.5 million in the third quarter 2010**

**Gross margin in line with the third quarter 2010 (41.2%), but showing an increase over the previous quarters of 2011**

**In this quarter, consolidated operating income was equal to €4.5 million (11.9% of revenues), almost doubled when compared to €2.4 million in the third quarter 2010 (6.8%)**

**Consolidated net income was equal to €1.5 million, tripled when compared to €0.5 million in the third quarter 2010**

The Board of Directors of SAES Getters S.p.A., gathered today in Lainate (MI), approved the Group's consolidated results for the third quarter 2011 (July 1 - September 30).

“There is a strong satisfaction for the results achieved in this quarter, occurred within an international scenario of strong uncertainty. We do not expect significant changes in the last quarter of this year, whilst the following months will be characterized by two opposite phenomena, the growth of new products and the downturn of our semiconductors business” **Eng. Massimo della Porta**, Chairman of SAES Getters S.p.A., said “The new SAES products are used in stable, or strongly increasing markets and this allows us to confirm growth expectations in the medium - long term, even in the present uncertain scenario”.

In the third quarter 2011, the SAES Getters Group has achieved **consolidated net sales** equal to €37.8 million, increasing by 7.6% compared to €35.2 million achieved in the corresponding period of the previous year<sup>1</sup>, despite the penalizing effect of exchange rate (-8%), mainly due to the weakening of the U.S. dollar against the euro. At comparable exchange rates, consolidated net sales would have increased by 15.6% compared to the previous year.

---

<sup>1</sup> In April 2011 SAES Getters International Luxembourg S.A. got the approval by the Chinese Administrative Authorities for the completion of the transfer of its shareholding (51% of the total shares) in the Chinese joint venture Nanjing SAES Huadong Vacuum Material Co., Ltd. to the Chinese minority shareholders. The economic data relating to the joint venture, starting from January 1, 2011 until the date of the transfer, and the other figures resulting from the transfer operation have been classified in a separate income statement item “Net income (loss) from assets held for sale and discontinued operations” in accordance with IFRS 5. Also revenues and expenses of the third quarter 2010 were reclassified to enable a homogeneous comparison with 2011.

With reference to revenues, the scope of consolidation is unchanged compared to 2010.

In this quarter, **consolidated gross profit** was equal to €15.6 million, compared to €14.5 million in the third quarter 2010. The gross margin, as a percentage of revenues, is unchanged from the third quarter 2010 (41.2%), but it shows an increase when compared to the previous periods of 2011.

In the third quarter 2011, **consolidated operating income** was equal to €4.5 million, almost doubled compared to €2.4 million in the corresponding quarter 2010 (the operating margin rose from 6.8% to 11.9%). **Consolidated income before taxes** was equal to €3.9 million and it shows a strong growth when compared to the third quarter 2010 (€1.9 million).

**Consolidated net income** was equal to €1.5 million, an amount that is more than three times that of the corresponding quarter in 2010 (€0.5 million).

**Consolidated EBITDA<sup>2</sup>** in the third quarter 2011 amounted to €7.4 million, increased when compared to €5.4 million in the third quarter 2010. As a percentage of sales, EBITDA was equal to 19.5%, compared to 15.3% in the third quarter of the previous year.

SAES Getters will hold a conference call today at 15:30 CET.

The dial-in numbers are as follows:

Italy: +39 02 802 09 11

UK: +44 121 2818 004

USA: +1 718 7058 796

The presentation will be available at [www.saesgetters.com](http://www.saesgetters.com), Investor Relations section, Presentations. Interested parties are invited to call a few minutes before the beginning of the conference call.

The conference call will be available for its listening for the following 24 hours on:

Italy: +39 02 72495

UK: +44 121 2818 005

USA: +1 718 7058 797

Access Code: 700#

### **Industrial Applications Business Unit**

**Sales** of the Industrial Applications Business Unit were equal to €26.6 million, showing an increase (+22.6%) when compared to €21.7 million in the third quarter 2010. The trend of the euro against the main foreign currencies led to a negative exchange rate effect equal to -8.6%, while organic growth was equal to 31.2%.

Compared to the third quarter of last year, please note the strong increase in the field of gas purification (Semiconductors Business), whose revenues were more than doubled (net to the exchange rate effect, its organic growth was +119.3%) also thanks to the efforts made by the Group to extend its businesses within the area of gas purification.

---

<sup>2</sup> EBITDA is not deemed a measure of performance under International Financial Reporting Standards (IFRS) and must not be considered as an alternative indicator of the Group's results. However, we believe that EBITDA is an important parameter for measuring the Group's performance. Since the calculation of EBITDA is not regulated by applicable accounting standards, the method applied by the Group may not be homogeneous with methods adopted by other groups. EBITDA is defined as "earnings before interests, taxes, depreciation and amortization".

In other business segments, revenues have declined due, in addition to the negative exchange rate effect, also to the deterioration of the macroeconomic situation and to a slowdown in public investments (mainly in the research and military sectors).

In particular, in the third quarter 2011, Lamps Business recorded revenues of €2.9 million, down by 10.3% compared to €3.2 million in the third quarter 2010. The effect of the exchange rates was equal to -2.1%. Net of the exchange rate effect, this decrease, equal to -8.2%, is mainly attributable to the particular situation of the Japanese market after the earthquake in early 2011, to the high stocks of some customers, causing a sales slowdown of both mercury dispensers for fluorescent lamps and traditional getter for discharge lamps and to increased price pressure.

In the Electronic Devices Business revenues were equal to €5.7 million, with a decrease of 16.1% compared to €6.7 million in the corresponding period 2010 (the overall organic decrease was equal to -11.7%). Despite the positive trend in the sales of getters and metal dispensers used in the medical diagnostics, in this quarter sales were affected by the slowdown in public investments, especially in the U.S. market, in the research and in the military sectors. The deterioration of the macroeconomic situation has also adversely influenced the business of sensors, especially that of the infrared ones.

The Vacuum Systems and Thermal Insulation Business recorded revenues of €2.6 million, decreased by 35.5% when compared to €4.1 million in the third quarter 2010. The exchange rate effect was negative and equal to -1.9%. The fewer special projects undertaken in the field of getter pumps for particle accelerators and the contingent situation on the Japanese market have affected the turnover of this sector. However, please note the success of the new pump NexTorr®, launched at the end of last year, and the positive trend in the business of getters for thermoses.

The turnover of the Semiconductors Business (gas purification) was equal to €15.5 million in the third quarter 2011, showing an increase of 100.7% compared to €7.7 million in the third quarter 2010. The exchange rate effect was negative and equal to -18.6%, while organic growth was equal to +119.3%. This growth was also supported by the efforts made by the Group to extend its businesses within the area of gas purification.

**Gross profit** of the Industrial Applications Business Unit was equal to €12.2 million in the third quarter 2011. As a percentage of net sales, gross margin was 45.6% down from 51% in the corresponding period of 2010 due to both the shift in the sales mix towards products with a greater consumption of raw materials and to the increasing pressure on prices (mainly in the Lamps Business).

**Operating income** of the Industrial Applications Business Unit was equal to €8.3 million in the third quarter 2011, with an increase of 10.8% compared to €7.5 million in the third quarter 2010. This increase is due both to the growth of sales that led to an increase in the gross profit and to higher revenues related to royalties derived from the licensing of the getter technology for MEMS, partially offset by a growth in operating expenses (in particular, higher selling costs due to the growth of sales). In percentage terms, the operating margin of this quarter was equal to 31.2% compared to 34.4% in the corresponding period of 2010.

#### **Shape Memory Alloys (SMA) Business Unit**

In the third quarter 2011, **consolidated sales** of the business unit dedicated to the shape memory alloys were equal to €10 million, compared to €11.3 million in 2010. The exchange rate effect was negative

and equal to -7.6%. Net of the exchange rate effect, the organic change was equal to -4.1%. Despite lower revenues, please note the growth over the previous quarter of 2011, achieved thanks to the launch of new products on the market.

In addition, it was positive the contribution of the industrial SMA sector, which represents a significant opportunity for the future development of SAES Getters.

**Gross profit** of the Shape Memory Alloys Business Unit amounted to €3.4 million in the third quarter 2011, showing a decline in absolute terms compared to €3.6 million in the third quarter 2010 (-5.7%) but showing an increase when calculated as a percentage of revenues: in fact, gross margin was equal to 33.8% in the third quarter 2011 compared to 31.7% in the corresponding period of 2010.

**Operating income** of the Shape Memory Alloys Business Unit amounted to €1.2 million in the third quarter 2011 (11.6% of revenues), compared to an operating income of €1 million in the third quarter 2010 (8.5% of revenues). The increase in gross margin, combined with the containment of operating expenses (down from €2.7 million to €2.2 million in this quarter), has allowed to end this quarter with an increasing operating result, despite lower revenues. This is also due to lower amortization as a result of the end of the useful life of some intangible assets of the U.S. subsidiaries, identified at the moment of the acquisition.

### **Information Displays Business Unit**

In the third quarter 2011, **sales** of the Information Displays Business Unit were equal to €0.9 million, down from €2 million in the corresponding period of 2010. The exchange rate effect was negative and equal to -3.5%. This decrease (-51.6% net of the exchange rate effect) was due to the structural and irreversible decline both in the business of fluorescent lamps for the backlighting of liquid crystal displays (LCDs) and in that of cathode ray tubes (CRTs). However, in the field of displays, the Group foresees a future growth thanks to increasing sales of highly innovative getter solutions for OLED applications<sup>3</sup>, which are expected to initially stand next to and then gradually replace the current LCD technology.

In the third quarter 2011, sales of the Liquid Crystal Displays Business was equal to €0.4 million, compared to €1.2 million achieved in the corresponding quarter 2010 (-66%). The currency trend led to a negative exchange rate effect equal to -2.4%.

The Cathode Ray Tubes Business recorded a turnover of €0.5 million, compared to €0.8 million in the third quarter 2010 (-39.2%). The currency trend led to a negative exchange rate effect equal to -5.1%.

The Information Displays Business Unit ended the third quarter 2011 with a **gross profit** essentially at break-even (€0.02 million, compared to a loss of -€0.02 million in the third quarter of the previous year). The gross margin returns, albeit slightly, to be positive (+1.9%) compared to a negative margin of -0.9% in the previous year as a result of the rationalization of the production structure completed during the current year with the shutdown of the LCD factory based in Korea. Finally, please note that the third quarter 2010 was negatively affected by extra costs related primarily to the area of personnel and to inventory write-downs.

---

<sup>3</sup> Please note that the figures related to OLED applications are currently included in the Advanced Materials Business Development Unit.

In the third quarter 2011, **operating income** of the Information Displays Business Unit was negative and equal to -€0.5 million, compared to -€1.1 million in the corresponding period of 2010: despite the containment of operating expenses, in this quarter the volumes were not sufficient to ensure a positive result.

### **Advanced Materials Business Development Unit & Corporate Costs**

In the third quarter 2011, **consolidated sales** of the Advanced Materials Business Development Unit amounted to €0.3 million (compared to €0.1 million in the corresponding period of 2010) and was mainly due to the sales of highly innovative getter solutions for OLED applications<sup>4</sup>.

The Advanced Materials Business Development Unit & Corporate Costs ended the third quarter 2011 with a **gross profit** essentially at break-even (+€0.02 million compared to a loss of -€0.2 million in the corresponding period of the previous year).

**Operating income** (negative and equal to -€4.5 million) of the Advanced Materials Business Development Unit & Corporate Costs includes both the result of the Advanced Materials Business Development Unit and those costs that cannot be directly attributed or reasonably allocated to any business sector but that refer to the Group as a whole. The operating loss of -€4.5 million has to be compared with a loss of -€4.8 million in the third quarter 2010. The improvement over the previous year is attributable both to higher sales volumes and to the reimbursement received by the Parent Company for the expropriation of part of the land owned.

**Total consolidated gross profit** was equal to €5.6 million in the third quarter 2011, with an increase of 7.4% compared to €4.5 million in the corresponding quarter of 2010. Gross margin amounted to 41.2% in the third quarter 2011, unchanged with respect of the third quarter 2010.

**Total consolidated operating expenses** were equal to €2 million, down with respect of €2.6 million in the third quarter 2010, demonstrating the continuing commitment of the Group to control costs. The increase in selling expenses (+3.8%), related to the growth of sales, is completely offset by lower general and administrative expenses (from €5.9 million in the third quarter 2010 to €5.3 million in the third quarter 2011). Research and development expenses were substantially unchanged.

During this quarter, the balance of other net income (expenses) was positive and equal to €0.9 million, compared to a positive figure of €0.5 million in the third quarter 2010. The increase is explained by the higher royalties generated by the licensing to ST of the thin film getter technology for MEMS of new generation (+€0.2 million) and by the indemnity received the Parent Company following the expropriation of part of the land owned (+€0.3 million).

In this quarter, **total consolidated operating income** was equal to €4.5 million, nearly doubled when compared to €2.4 million in the corresponding period of the previous year. As a percentage of sales, gross margin was equal to 11.9%, compared to 6.8% in 2010.

The strong growth in operating income was primarily due to the increase in sales, the containment of operating expenses, the higher royalties income.

---

<sup>4</sup> As previously underlined, please note that the figures related to OLED applications are currently included in the Advanced Materials Business Development Unit.

In the quarter, **total consolidated EBITDA** was equal to €7.4 million, compared to €5.4 million in the same period of 2010. As a percentage of sales, EBITDA was equal to 19.5%, showing an increase both compared to the corresponding quarter 2010 (15.3%), and to the previous periods of 2011 (16.8% in the first quarter and 18.2% in the second quarter).

The net balance of financial income (expenses) was negative and amounted to -€0.5 million (-€0.7 million in the corresponding period 2010) and it mainly includes: interests on loans held by the American companies and on the short-term loans held by SAES Getters S.p.A.; the effect on the income statement of the evaluation of the Interest rate Swaps (IRS) contracts signed by the same U.S. companies; the bank charges for undrawn credit lines by the Parent Company. In this item it is also included the share of the results attributable to the Group of the joint venture Actuator Solutions GmbH, evaluated with the equity method.

In the third quarter, the sum of the exchange rate differences recorded a negative balance of €0.2 million (to be compared with a positive balance of €0.1 million in the corresponding period of 2010) and it mainly includes exchange rate losses realized from the conversion of cash denominated in euro of the Chinese subsidiary SAES Getters (Nanjing) Co., Ltd. and of the financial credits in euro that the same Chinese company had towards the rest of the Group, following the appreciation of the renminbi over the euro.

**Income before taxes** was positive and amounted to €3.9 million, more than doubled compared to €1.9 million in the third quarter 2010.

In this quarter, **income taxes** were equal to €2.3 million, compared to €1.1 million in the corresponding period of the previous year.

In the third quarter 2011, **consolidated net income** was equal to €1.5 million (4% of consolidated sales), with a sharp increase (+180.1%) compared to a net profit of €0.5 million in third quarter 2010 (1.5% of consolidated sales).

The **consolidated net financial position** as at September 30, 2011 was negative and equal to -€6.8 million (cash of €17 million vs. net financial liabilities of -€43.8 million), and it has to be compared with a negative net cash of -€21.3 million as at June 30, 2011.

The self financing generated during the quarter was fully offset by the deterioration in the net working capital (in particular, temporary increase in trade receivables related to the growth in the Semiconductors business).

The investing activities absorbed resources for €1.4 million (net investments in fixed assets close to €0.9 million, plus the payment for the subscription of the share capital of the new joint venture Actuator Solutions GmbH that was equal to €0.5 million).

The exchange rate effect was negative and equal to about €1.5 million: 85% of the borrowings of the Group is represented by U.S. dollar loans held by the American subsidiaries, whose equivalent value in euro has increased as a result of the revaluation of the dollar against the euro.

### **January - September 2011**

In the first nine months 2011, **consolidated sales** were equal to €13.8 million, showing an increase of 11.3% compared to €102.3 million in the corresponding period of 2010. The currency trend led to a negative exchange rate effect equal to -5.9%.

Sales of the Industrial Applications Business Unit were equal to €81.2 million, increasing by 31.6% compared to €61.7 million in the first nine months of 2010 (with a negative exchange rate effect equal to -

6.5%). The Shape Memory Alloys Business Unit ended the first nine months of 2011 with consolidated sales of €9.2 million, broadly in line with the €9.8 million achieved in the first nine months of 2010 (with a negative exchange rate effect equal to -6.3%). There was a structural decline in the Information Displays Business Unit, that in the first nine months of this year posted revenues of €2.8 million, compared to €10.4 million in the corresponding period 2010, with a negative exchange rate effect equal to -1.4%. The revenues of the Advanced Materials Business Development Unit increased and rose from €0.4 million to €0.6 million in 2011 (the exchange rates effect was equal to -2.1%).

**Consolidated gross profit** was equal to €46.1 million in the first nine months of 2011, unchanged from the corresponding period of 2010. The consolidated gross margin was equal to 40.5% compared to 45.1% in the first nine months of 2010. At Business Units level, the decrease in gross margin recorded in the Information Displays Business (-27.1% as at September 30, 2011) due to lower volumes, stood next to a decrease in the Industrial Applications Business (from 52.1% to 46.6%), due both to the shift in the sales mix towards products with a higher consumption of raw materials and to the increasing pressure on prices. The gross margin of the SMA Business increased slightly (from 31.5% to 32%).

In the first nine months of 2011, **operating expenses** amounted to €37.1 million, respectively divided into €0.1 million for R&D costs, €10.2 million of selling expenses and €16.8 million of G&A expenses. In the first nine months of 2010, operating expenses amounted to €39 million. Compared to 2010, the decrease is mainly related to G&A expenses, whose decrease completely absorbed the higher selling expenses mainly due to the increased commissions paid to agents as a result of the increase of sales in the purification business. Research and development costs remained essentially unchanged.

In the first nine months of 2011, **consolidated operating income** was equal to €1.9 million (10.5% of consolidated sales) compared to €0.7 million in the corresponding period of the previous year (9.5% of consolidated sales). This increase is primarily attributable to lower operating expenses; however, the growth of revenues is offset by the reduction in the gross margin.

**Consolidated EBITDA** was equal to €20.7 million in the first nine months of 2011 (18.2% of sales) compared to €18.5 million in the same period of 2010 (18.1% of sales).

**Income before taxes** in the first nine months 2011 amounted to €10.6 million (compared with a net income before taxes of €5.9 million in the corresponding period of 2010).

**Income taxes** in the first nine months of 2011 were equal to €6.4 million, compared to €3 million in the corresponding period of 2010. The tax rate rose from 50.1% to 59.9% and it is mainly due to higher tax losses realized by the Parent Company in the Italian tax consolidation program, on which deferred tax assets are not recognized, given that there isn't any reasonable certainty of their recoverability in future years.

**Consolidated net income** in the first nine months of 2011 was equal to €4.6 million, increased by 47.3% compared to €3.1 million in the corresponding period of the previous year.

In the first nine months 2011, net income per share was equal to €0.2011 per ordinary share and €0.2179 per savings share (compared to €0.1348 per ordinary share and €0.1516 per savings share in the first nine months 2010).

## **Events subsequent to the end of the quarter and business performance outlook**

The trend of the last quarter of 2011 is expected in line with the previous quarters.

We expect a 2012 characterized by two opposite factors, the downturn of the cyclical business of semiconductors and the growth of sales related to the new products launched by the Group.

The dynamics of these factors will depend upon the evolution of the international scenario, which is still characterized by a strong uncertainty.

Please note that these figures are taken from the Interim Management Report for the third quarter 2011, not subject to audit.

This document will be distributed through the NIS circuit of the Italian Stock Exchange, published on the Company's website [www.saesgetters.com](http://www.saesgetters.com) and sent to Consob by tomorrow.

### **SAES Getters**

*Pioneering the development of getter technology, the SAES Getters Group is the world leader in a variety of scientific and industrial applications where stringent vacuum conditions or ultra-pure gases are required. For 70 years its getter solutions have been supporting innovation in the information display and lamp industries, in sophisticated high vacuum systems and in vacuum thermal insulation, in technologies spanning from large vacuum power tubes to miniaturized silicon-based microelectronic and micromechanical devices. The Group also holds a leading position in ultra pure gas refinement for the semiconductor and other high-tech markets.*

*Starting in 2004, by leveraging the core competencies in special metallurgy and materials science, the SAES Getters Group has expanded its business into advanced material markets, in particular the market of shape memory alloys, a family of advanced materials characterized by super elasticity and by the property of assuming predefined forms when subjected to heat treatment, that are applied in the biomedical sector and, more in general, in niche industrial fields.*

*A total production capacity distributed in ten manufacturing centers across 3 continents, a worldwide-based sales & service network and more than 1,000 employees allow the Group to combine multicultural skills and expertise to form a truly global enterprise.*

*SAES Getters is headquartered in the Milan area (Italy). SAES Getters is listed on the Italian Stock Exchange Market since 1986, STAR segment.*

*More information on the SAES Getters Group is available in the website [www.saesgetters.com](http://www.saesgetters.com).*
